In the era of Henriksson and Raija "no mercy" Toiviainen, the Finnish rule of law has been polished to the extreme from the point of view of corruption, injustice and partiality, which means, in a simplified way, that the courts of our country have practically been turned into a stage for the use of power for citizens, where people go to seek judgments for ridiculous sayings from about 20 years ago with judgments, which is news to the people is already approaching the manipulation and misleading of citizens in the name of justice.

<https://www.finnishcrimereporter.com/raija-no-mercy-toiviainen>

Based on the news, the state in which the criminal investigation of the Finnish police and the activities of the prosecutor's office have been conducted is already almost 100% close to a dictatorship, and it is for its problem citizens who can already be staged in our medical care for medically non-existent diseases, where we can feed harsh chemical compounds, i.e. modern-day conversion drugs, into the depression of an autumn day, which inevitably leads to an act that shocks the community, which only feeds the people's hatred towards these problem citizens caught in the clutches of the authorities.

## **ANNA-MAJA HENRIKSSO AMENDMENTS TO THE CRIMINAL LAW**

During Henriksson's reign, the Criminal Code has been changed regarding threats to doctors, so that the prosecutor can make the decision to charge practically without the doctor's consent. The reform of this law brings more mental superiority towards all second-class citizens who are abused by medical care, some of whom are actually murdered out of society for spending taxpayers' money in the name of the state's interest (Jimi Karttunen)

<https://www.finnishcrimereporter.com/murder-of-jimi-karttunen>

These persons are therefore completely unable to defend themselves against the official corruption of our country which attacks them when there is no one to represent their interests in the nominal rule of law of our country, their last resort and the only one is to aggressively attack the perpetrator of the abuse, which is the last defense mechanism of every animal and which is currently being fully exploited in our medical care towards these persons and our Minister of Justice is supporting this activity without doing anything about the criminal law reforms. This law also provides greater security for psychiatric abuses, as it is easier for a patient who has suffered from abuse to be taken to the courts to hear unjust verdicts in the medieval style.

## **DEMOCRATIC DICTATORSHIP AND ITS COURTS**

The courts of our country are no longer a concern of a normal citizen, they only go there to hear judgments, the background of which is the cooperation of the authorities with the police and psychiatry. When going here, the citizen has nothing more to do when they have been provoked into

actions by the authorities' unjust actions and instructions, and most of which are still drugged by psychiatry with drugs that lower brain functions, so that surely the inhibitions will not stay on when people in their rage attack the society.

### **Jouni Kauppila's treatment in court**

Kauppila, who was blackmailed by Ylivieska's unit and medicated by them with drugs that reduce brain functions, will get to the courts of our country in black and white how he is no longer capable of making decisions about himself.

If I'm defending this case a bit now, if in our country any person is isolated on Kela's subsistence allowance and fed for 3 years modern conversion drugs that lower brain functions and chemical compounds for imaginary diseases that don't even exist medically, then what should be said about this other than OFFICIAL CORRUPTION AND WITCHCRAFT.

These cases are deliberately allowed to escalate as far as church burnings, and in court only judgments are read or a person is sent to the human rat farm of the University of Turku to be investigated by the PRONIA and METSY teams with staged and imaginary diseases

This action by the courts of our country only proves how biased they are, and how official corruption, which includes the use of bureaucracy on the part of the coil and the employment office, can push isolated persons who are not in working life into a completely unsustainable situation, and no other single person would survive this if it were against the corrupt authorities of our country .

### **The treatment of the planners of the Helsinki massacre in court**

These people were not helped even by the representative who actively defended them, which is the only thing I have noticed after investigating these cases about 1/10 and it still didn't seem to lead to anything even though the boys planned this activity with the police....I wish there was a police chief. This tells more about how good the relationship between the police, psychiatry and our judiciary is when it comes to a problem citizen who wants to be staged out of the better part of society so that some have a job and the right to taxpayers' money at the price of the health and freedom of these people.

## **THE RULE OF JURISDICTION FINLAND THAT TREATS PROBLEM CITIZENS IN A DICTATORIAL UNJUSTICE**

### **The axeman from Salo**

Having investigated the cases that happened in Finland, the desperate act of this person also saves his girlfriend from exactly the place where I would be ordering an extremely extensive criminal investigation to find out the actual operation of our country's psychiatric clinics, whose forms of treatment are offered to problem citizens in the name of empathy, but they are nevertheless classified as forms of medical torture.

Even in the background of Salo's carpenter, there are unfair actions and decisions by the authorities, which should by no means be in such a big contradiction that a person threatens the authorities with

a bomb. Since there are no impartial authorities in Finland to investigate the treatment of our country's problem citizens, I should be allowed to get to know this case as well, after which I would of course write an impartial version of it on linkedin because you can already see from the news coverage that it is not impartial.

<https://www.mtvuutiset.fi/artikkeli/video-mies-murtautui-kirveella-mielisairaalaan-ja-pakeni-pakkohoidossa-olleen-naisen-kanssa-holtiton-kaahaus-paatty-piikkimattoon/8191010>

The authorities behind this person also have extremely radicalized ideas about our problem citizens, similar to Hanna Parhaniemi.

It's clear as day that this person's intentions to save his girlfriend from a psychiatric institution with an ax are definitely rooted in the same thing I'm running after, that is, the actual action that doesn't count as helping anyone, but the opposite.

It's sad to say, but if I had to choose the side of the corrupt Finnish police, who chase these pitiful problem citizens with authority, or of these problem citizens who are trying to save their girlfriends from the institutions of our country, which are known for their human rats, I would be on the side of the problem citizens now and always.

If our country were a rule of law, we wouldn't have mental hospitals that are all behind these problems and this is clearly the reason for the human rat business that our country's academic researchers need in the field of medicine.

### **The use of bureaucracy against the axeman**

The background of Salo's case was also the unjust decisions of the authorities regarding his family, which I have also come across on the reel side. The background of these decisions is unfair decisions and legal interpretations, in relation to which there is no way to cooperate with the authorities, whether the decisions are, for example, fair towards an individual who is already insolvent anyway.

These extremely unfair actions are also the background of all the patients staged by psychiatry when they are provoked with drug treatments to attack our society, where some of the staged patients unfortunately manage to take many innocent bystander victims with them due to the unfair actions of the authorities who, however, act in the news based on the statements of Anna-Maja Henriksson in accordance with the principles of the rule of law.
