WHICH DOES NOT SUPPORT MURDER	4

Marja-Leena Niinistö, who died in a car accident in 01/1995, does not seem like an accident after 4 years investigating the dirty corners of the Finnish authorities. The Finnish police, which in 1995 consisted of "druggie" Jari Aarnio, Testament forger and house thief Juha "mess-up" Rautaheimo, Kari "x-files" Tolvas and the rock pimp, Kenneth Erikosson. This group has certainly buried many crimes committed by the authorities during their career, and they certainly have not made an exception for Sauli Niinistö, who was a rising politician from the rotten University of Turku, who has connections to the state leadership.

CASES THAT SUPPORT THE MURDER OF MARJA-LEENA

The CEO's poisoning with methanol

<https://www.iltalehti.fi/uutiset/a/2016080722023712>

<https://www.iltalehti.fi/uutiset/a/2016081222062194>

A wife who, in her jealousy, killed her husband as systematically as by poisoning her ex-husband with methanol, who nevertheless drank alcohol in moderation.

The woman tested the next smaller dose of methanol at the beginning of June, after which she gave a larger dose around Midsummer, in which context she tried to slander her husband as a substitute alcohol user. This activity, i.e. defamation of another, is extremely common from YLE's propaganda apparatus when it reports on citizens killed by our country's authorities, the clearest example of which is in connection with Jimi Karttusen and Tuomas Teräsvuori, where both were smeared as drug users, of which Teräsvuori is even too clear and an outrageous case from YLE.

This proves what a person is capable of with the help of revenge and anger and which the friend club of the University of Turku has surely noticed and which was used in connection with the Kauhajoki school massacre when Matti Saari was guided with the help of psychiatry and by raising his state of mind to the level that he is capable of such a shocking action. There could have been a large number of people behind Saari, but they have been ignored because the background of all the school deaths in Finland has been most likely Anne Holmlund, who as the Minister of the Interior made sure that the investigations did not progress on Matti Saare, especially the psychiatric clinics, which had the greatest responsibility for the success of these deaths.

Versus Sauli Niinistö

The methanol poisoning case proves what even a single woman is capable of doing independently in these jealousy dramas, and if you compare this case to Sauli Niinistö, there has never been anything other than a fight between her and Marja-Leena or, for example, Marja-Leena's desire to divorce... maybe even because of another man who could it's fine to initiate revenge in some people, of course, just like when the murder of the CEO is attempted to be disguised as an accident where the victim is slandered. A basic YLE propaganda machine in cases where there are clear indications of the involvement of our country's authorities in the deaths.

Marja-Leena's death could very well be an accident, but the Finnish police can't prove that, which is full of drug dealers (Jari Aarnio), rock pimps (Kenneth Eriksson), x-files fans (Kari Tolvanen) and, to top it off, I, testament thief and crime scene cleaner (Juha "mess-up" Rautaheimo).

The death of Jimi Karttunen

Karttunen, who was murdered by a post-traumatic metabolic reaction, during which all the drug antibodies were pumped into his body, which interfered with his post-traumatic metabolic reaction. In the cases I've investigated, this is undoubtedly the most planned, complete and shocking murder and a demonstration of what the most ruthless beast on earth, the white man, is capable of at his best. Total murder but not for the talents of Minna Pass who are completely unstoppable in their own class.

<https://www.finnishcrimereporter.com/murder-of-jimi-karttunen>

Versus Sauli Niinistö

Karttunen died during Niinistö's presidency, and it is clear that if Saul has the will of a murderer, which can be clearly seen from other cases, he has by now gathered his own "team" and a clan of tail men who are capable of this kind of activity in Finland, where the end result is a dead patient. The professors of the University of Turku, who have been in the dark side of medicine all their lives, i.e. the mental hospital in the business, have not been able to leave a mark on them and as far as the Finnish cases are concerned, they have already gathered to train their own ideological offspring, which also includes Timo Vähämurto, who graduated from the Oulu Medical School, which unfortunately only proves the uniform operating methods of Finnish medicine throughout the country. I will have my own article about Timo Vähämurto, where I will tell more about the activities of Timo and Walta Maija.

The death of Tuomas Teräsvuori

Tuomas Teräsvuori is a very clear case of what is done in Finnish politics and the business world, i.e. very planned murders that are handled by ex-minister Suvi Linden. Teräsvuori, who apparently had done something morally wrong, for which Sauli Niinistö's coalition party gave him a death sentence to be implemented in African countries.

Versus Sauli Niinistö

This is really Sauli Niinistö at his best, where his own arms manufacturer Patria was involved, through which the cogs of the execution machine were set in motion.

WHICH DOES NOT SUPPORT MURDER

This case could really be an accident, but Niinistö has so many accusations from my side, such as the murder of his own party's Tuomas Teräsvuori in Uganda, which was carried out on behalf of the arms manufacturer Patria, which leaves us wondering if Niinistö is really so omnipotent that he has the guts to take care of unwanted MPs... the devil through a government arms manufacturer. This can't be

anything other than arrogance about one's own abilities or stupidity, but whatever it is, at least our dear Saul is not alone here holding a name tag under his chin.
